What is Kaltura?

Kaltura is a video management system that allows teachers to record videos, screen captures, presentations, and other media and upload them to a safe, shared space within a school's digital learning environment.

Why should I use Kaltura?

- **ACCESSIBILITY:** Upload recordings to Kaltura cloud storage for automatic captioning.
- **CANVAS INTEGRATION**: Share videos, presentations, and other media within a Canvas course.
- **FLEXIBILITY**: Share videos within a Canvas course or your school network, or send individual video messages to parents and students.
- **SAFETY**: Send videos and presentations directly to students without re-routing them to YouTube.
- **STORAGE**: Upload media to the Cloud so you don't run out of video storage in Canvas.

How do I access Kaltura media?

You can view Kaltura media **privately**, as a **class**, and as a **learning community**:

MY MEDIA	MEDIA GALLERY	MEDIASPACE
PRIVATE MEDIA Access and edit your own recordings and uploads; visible only to you until uploaded to Canvas course	**COURSE MEDIA** Manage media for *one* Canvas course; media accessible to all students and teachers within Canvas course	**SCHOOL MEDIA** Media accessible to full learning community, safe and ad-free; your school's "YouTube" channel
